### **Signature HealthCARE Announces New Corporate Headquarters and Innovative Partnership!**

Signature HealthCARE is thrilled to announce that it has selected Louisville, KY as its new headquarters location as well as partnered to create the International Center for Long Term Care Innovation!

As one of the top 12 largest long term care companies in the U.S., Signature HealthCARE started a diligent process 10 month ago to find a new headquarters home which resulted in three prime locations: South Florida, Tennessee, and Kentucky. All three states aggressively pursued incentivizing Signature HealthCARE to move its headquarters to their area. After reviewing numerous options, these three areas were chosen based upon four major criteria: quality and quantity of healthcare talent (expected growth plans), ability to expand organizationally (provide services in new states), partnerships with higher education (key for this learning company), and economic operating costs for the organization (the goal is to remain the low cost quality leader). With aggressive growth plans, an excellent corporate citizenship track record, and a thorough review process, Louisville, KY was a great match for the company.

Equally exciting, Signature HealthCARE has partnered with UofL, GLI, Kentucky Economic Development and other collaborative groups to create International Center for Long Term Care Innovation. This company is focused on the commercialization of research and industry generated ideas specifically in the Long Term Care sector. The International Center for LTC Innovation specializes in accelerating the development of health technology and services based innovation. The Center will be one of the first tenants in the new location Nucleus, UofL's Kentucky Life Science Center, is building on the old Haymarket site in downtown Louisville.

Only two years old, Signature HealthCARE is founded on three main organizational pillars: intra-preneurship, learning, and spirituality. Signature's mission is to radically transform long term care in the U.S. through resident-centered care and employee empowerment. Currently, Signature employs more than 125 headquarter jobs and approximately 11,000 nationwide with a goal to expand headquarter employment to approximately 170 within the next two years.

The company believes its pillar concept is a unique model and has changed the organization dramatically, evidenced by Signature HealthCARE receiving three "Best Places to Work" awards from prestigious publications including *South Florida Business Journal*, *Florida Trend Magazine*, and *Modern Healthcare Magazine*. Having engaged, dedicated, and innovative employees foster better quality care for residents.

Signature HealthCARE is redefining care by earning the trust of every resident, family and community it serves.
